1 General Info

This document must be read before handling and using lithium batteries. Thunder Power’s battery guide is attached to this document (or can be accessed at [http://www.thunderpowerrc.com/app/site/media/sitemedia.nl/id.132007/.f](http://www.thunderpowerrc.com/app/site/media/sitemedia.nl/id.132007/.f)) and must be read fully.

2 Disposal

1. Discharge with the 10Ω power resistor aluminum block until voltage is lower than 1V. Ensure battery stays close to room temperature.

2. Grab a bucket, lid, and label from the HazMat disposal area. Put discharged battery in bucket, put on lid, and label as “LiPo Battery”.

3. Put bucket in HazMat area for disposal.

3 Emergency

If a battery is actively burning, pull fire alarm and exit the building.
